

# Noise Management Plan

---

ACTIVITY: OUTDOOR BEACH VOLLEYBALL

LOCATION: ALL LOCATIONS

DATE: 12<sup>th</sup> September 2019

VERSION: 2.0

---

Our events require amplified speech and music to run correctly. We are very aware that there are local residents in the area that we do not wish to disturb. For that reason we have developed this noise management plan to minimize the disruption to locals and other beach users.

1. We use a distributed sound system to allow lower volumes from each station.
2. As sound travels in waves and is mainly directional, we face our speakers from the sea wall towards the courts and the bay to minimize noise pollution towards the residents.
3. We do not turn on our music until at least 9am, and do not use amplified speech before 9am either.
4. We have tested our noise levels on one of our events with a noise measuring app and found that the noise from our speakers is lower than that coming from passing traffic when standing on the side of the road next to the houses along Beaconsfield Parade.
